PROFILE

Dynamic and innovative Software Developer with a degree in Information Technology from Monash University, Melbourne. Specialized in Software Development with comprehensive expertise in both front-end and back-end technologies. Adept at database management, user interface design, and client communication within Agile frameworks. Demonstrates a robust understanding of software development principles, particularly in object-oriented design and systems development, consistently applied to solve complex real-world challenges.

Recognized for achieving high distinction in Object-Oriented Design and Implementation and excelling in industry projects and mobile app development. Experienced in creating and maintaining efficient databases, developing intuitive and user-friendly interfaces, and managing client communications effectively. Proven ability to thrive in Agile environments, participating actively in sprint planning, daily stand-ups, and iterative development cycles.

Passionate about leveraging technical expertise to drive innovation and deliver impactful solutions. Known for strong problem-solving abilities, collaborative teamwork, and a commitment to continuous learning and improvement. Eager to bring academic knowledge and practical experience to a forward-thinking team, contributing to cutting-edge projects and achieving outstanding results. A valuable asset ready to make an immediate and significant impact.

SKILLS

Programming Languages: Java, PHP, JavaScript, Swift

Web Development: HTML, CSS, Node.js
